# A DIGITAL GREMLIN WITH BAD MANNERS AND GOOD TASTE.

ART • MEMES • NFTs  
• CHAOS

Art, memes, NFTs and whatever other bullshit NiFTy gets into next. No roadmap to the moon. No promises. Just a gremlin building shit and causing chaos. **Welcome to the infestation.**

01

## What is NiFTy\_Fckr?

NiFTy\_Fckr (\$NFTF) is a creator-led, community-influenced meme coin and digital art project built on Solana.

At the center of the project is the NiFTy\_Fckr gremlin - a mischievous, brutally honest character built around memes, original artwork, Web3 culture, and having a little fun along the way.

\$NFTF is the beginning of the NiFTy\_Fckr ecosystem, not the finished product.

The project is being built for the long term, with original NFTs, artwork, collaborations, and additional utility planned as the ecosystem develops.

02

## Creator-Led. Community-Influenced.

NiFTy\_Fckr is built alongside its community without being governed by it.

Community feedback, engagement, ideas, and culture may influence artwork, NFT concepts, collaborations, events, and future development.

Final creative, operational, partnership, and strategic decisions remain with NiFTy\_Fckr.

\$NFTF is not a governance token, and holding \$NFTF does not provide voting rights, equity, management authority, or ownership of the NiFTy\_Fckr project.

***The community helps shape the world. The gremlin still drives the bus.***

03

## The NiFTy\_Fckr Ecosystem

\$NFTF launches as the foundation of a larger creative ecosystem.

**Development is expected to include:**

- Original NiFTy\_Fckr artwork
- NiFTy\_Fckr NFT collections
- Community events and contests
- Collaborations
- Holder-oriented experiences and releases
- Additional digital and physical projects as the brand develops

The first NiFTy\_Fckr NFT collection is currently in development.

Rather than delaying the entire project until the collection is complete, \$NFTF launches first and allows the ecosystem to grow from the token outward.

04

## Utility

---

\$NFTF is intended to become the central token of the developing NiFTy\_Fckr ecosystem.

Future utility may include access to special releases, NFT-related experiences, holder perks, contests, collaborations, merchandise, digital content, and other integrations developed specifically for NiFTy\_Fckr.

Additional real-world or give-back utility may also be explored as the project grows.

NiFTy\_Fckr will not advertise planned utility as completed utility.

Features will be announced and documented as they are developed and implemented.

05

## Long-Term Development

---

NiFTy\_Fckr isn't being built around a single launch.

The goal is continued development of the character, artwork, \$NFTF ecosystem, NFT collections, collaborations, and future projects under the NiFTy\_Fckr identity.

Development will happen deliberately rather than forcing releases simply to meet artificial deadlines.

**Plans can evolve.**

**Ideas can change.**

**The gremlin isn't going anywhere.**
